DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1, 5, 6, 8, 12, 13, 14, and 22-26 in Paper No. 4 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 5, 6, 8, and 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Cohen et al.

Cohen discloses a Patella replacement comprising:

- A fist member made of a biocompatible material 16;
- Three apertures 18;
- A second member 12 made of polyethylene, titanium, and cobalt;
- Three projections 27; and
- The use of a porous Metal HEDROCEL.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3732

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 22-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen in view of Afrait et al.

Cohen lacks the use of a coating. Afrait teaches the use of a coating hydroxyapatite for knee prosthesis. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Cohen with the coating as taught by Afrait in order to increase the attachment between the implant and the living tissue.
